

Oshawa Reno / Addition

Our clients desired a **two-car garage** that seamlessly blended with their existing home's style, as well as a new front entry that would elevate the look and feel of their home's exterior. After discussing their needs and preferences, we got to work designing a solution that would both increase their home's functionality and enhance its aesthetic appeal.

Our clients were thrilled with the finished project. The new **garage** has not only improved the convenience and storage space for their family, but it has also enhanced the overall value of their home. The **new front entry** has become a favorite feature, offering a sophisticated yet inviting touch that's perfect for both everyday use and hosting guests. We love how this renovation/addition allowed us to meet our clients' needs while giving their home a refreshed, updated look.

As their trusted custom home builder, we take pride in delivering projects that combine practicality with beauty. This renovation is a perfect example of how thoughtful design and quality craftsmanship can come together to create a home that's both functional and full of character.
