

Skyes Custom Home

We had the pleasure of designing and building a stunning modern two-story custom home for our clients, set against the backdrop of a breathtaking waterfront location. This home spans 2,800 square feet, with four spacious bedrooms, a home office, and a layout specifically designed to take full advantage of the unobstructed water views. The clients came to us with a clear vision: they wanted a contemporary home that offered open, airy spaces and an immersive connection to the stunning waterfront setting. The design brief called for large windows to maximize the panoramic views of the water, while providing a modern, functional space that supported their lifestyle. We worked closely with them to create a home that balances sleek, modern aesthetics with practicality and comfort.

Client Satisfaction:

Our clients were thrilled with the finished product—a modern waterfront home that not only met their practical needs but also allowed them to fully embrace their surroundings. The large windows and open design created an airy, light-filled home that brings the outside in, offering unparalleled views of the water from every corner of the house. The home office was exactly what they envisioned, providing a peaceful and productive environment with a view that's hard to beat. As their trusted custom home builder, we take immense pride in how this project turned out. This home perfectly balances modern design with a functional layout and an emphasis on the spectacular waterfront views. Every detail was carefully considered to create a home that feels as timeless as it is contemporary—one that fits seamlessly into its stunning natural setting.
